

CHEESE POWDERS

Cheese Powders are the dehydrated form of natural cheese with some functional ingredients. They are dried to increase versatility of use in food manufacturing. Available at a variety of price points and flavor profiles to fit your formulation needs and used to deliver cheese flavor in any product application.

FEATURES AND BENEFITS:

Dehydrated products have a **long non-refrigerated shelf life** and are ideal for use in low-moisture and low-water-activity applications.

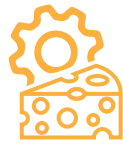

Easy hydration streamlines cheese sauce manufacturing.

Low moisture means **lower shipping costs** and **storage costs**.

The powdered form **simplifies scaling** and use in manufacturing.

Cheese Powder products can be combined to create your own **signature flavor profile**.

APPLICATIONS

Can be used in all manufacturing processes such as freezing, coating, batter/breading, retorting and baking.

DAIRY FLAVORS - EXCEEDS

Exceeds make it possible to increase the impact of cheese and dairy flavor in your formulation without significantly increasing the cost of your product. They are made from proprietary cultures developed by KHI scientists to pack your recipes with the punch of flavor.

Exceed flavors are **dairy multipliers** designed to work with the dairy components in your formula to multiply their **flavor impact**.

Exceed Plus products deliver the **cheese flavor** themselves at a heightened level and allows the user to **reduce the use of dairy content** in the formula.
